FinTech Services Riding on Artificial Intelligence

16 September 2019

HKIB CPD	SFC CPT
2 Hours	2 Hours

Objectives

Upon completion of this workshop, the participants will be able to enhance their subject matter knowledge in Artificial Intelligence via:

- Introduction of essential A.I. principles and technologies
- Discussion of the applications and use cases of A.I. in finance
- Exploration of innovative uses and opportunities of A.I. in FinTech

Programme Outline

- Global and China technological and application developments in A.I. and Machine Learning
- Advanced topics including robotic process automation (RPA), clustering (unsupervised learning), and quantum computing
- Opportunities and challenges in A.I. strategy implementation

Target Audience

This class is for banking executives and practitioners of all divisions. Audience can expect intermediate depth of knowledge in various FinTech topics.

Speaker

The speaker has professional experience in investment banking and technology research for over 11 years. He started his career in several major investment banks and then moved on to become a venture capitalist focusing on artificial intelligence. The speaker was formerly a researcher at Harvard Business School. He is a holder of Financial Risk Manager (FRM), Chartered Financial Analyst (CFA), and Chartered Alternative Investment Analyst (CAIA). He has earned a Master of Business Administration (MBA) at Harvard Business School, Master in IT in Education (Distinction) at The University of Hong Kong and Bachelor in Business Administration (*summa cum laude*) at University of California, Berkeley.
